ABSTRACT

Maritime Law & Policy

Maritime Liens, Arrest of Ships, maritime safety, maritime environment , international conventions, insurance and dispute resolutions

Port Management

Geopolitics and technology are pushing for changes in maritime trade routes, pushing ports and maritime cities to compete on offerings to the maritime sector in a bid to attract the industry's top shipping companies, jobs and expertise.

Shipping and Logistics

The trend towards greener shipping will create a significant shift in the logistics industry as it has been established that this not as a temporary trend but as a fundamental element of modern shipping , are the emerging economies prepared for this transformation ? How can they support this change?

Shipbuilding

In recent years, the maritime sector's distinctive activities and challenges have pushed for new branches in shipbuilding such as green ship designs and materials, and the introduction of innovative technologies and fuels aimed at enhancing ships' energy efficiency.
